## PROJECTS

---

### STORY FLOW BLOG

Personal Project – Port Harcourt, Nigeria

February 2025

- Developed a **full-stack** blog platform using **Next.js**, **TypeScript**, **Prisma** and **Neon PostgreSQL**, with authentication via **NextAuth** and role-based access control.
- Implemented a modern UI/UX with **Framer Motion** animation and responsive design for a seamless user experience.
- Integrated a **Rich-text editor (Tiptap)** for post creation and editing while supporting **media uploads** via **Cloudinary**.
- Designed and managed a structured database using **Prisma ORM with Neon PostgreSQL**, optimizing queries and ensuring data consistency.
- Built an **Admin dashboard** for managing users, post, categories and comments, incorporating analytic and moderation features.
- Implemented a **secure authentication system** with NextAuth credentials provider, including password reset via **Brevo (Sendinblue)**.

### WEATHER API APP

Personal Project – Port Harcourt, Nigeria

December 2024

- Developed a **front-end** weather checker application using **React and vite**.
- Implemented **API fetch** from weatherapi.com to get real-time weather data on city provided by users.
- Designed a beautiful interface to display weather information on city provided by users.
- Integrated a **dynamic** background change in response to weather status.

## ROCK PAPER SCISSORS GAME

Personal Project– Port Harcourt, Nigeria

November 2024

- Designed a **front-end** Rock paper scissors game using **React and vite**
- Implemented a computer auto generated moves for users to play with computer.
- Integrated a game score feature that uses **localStorage** to save and retrieve game score even after reload, exit and re-entry to the application.
- Implemented and **auto-play** for users so the game auto-play with computer for them..
